IEEE 802.11 b/g/n 2.4 GHz Wi-Fi

BRAND: Xiaomi

MODEL: CMSXJ19E

EAN/UPC: 6971085310077

Intelligent IP Camera

The Xiaomi Imilab A1 is a completely wireless camera, it can be installed both indoors and outdoors. The wireless design does not require any form of wiring, which greatly simplifies the installation process. The camera is equipped with bi-directional audio system and AI tracking with motion detection.

Recordings in the cloud

The Imilab A1 camera has motion detection functions, which is triggered when a human body is detected. When motion is detected, the camera automatically starts recording and then transfers the video about the memory in the cloud. The video file is stored in the manufacturer's Mi Cloud.

Self-tracking of moving objects

Thanks to advanced Xiaomi algorithms, Imilab A1 can detect moving objects, automatically track and record their movements, while providing real-time notifications and videos.

High quality

The camera has been equipped with infrared and IP66 hermetic housing, additionally Xiaomi Imilab A1 has been equipped with F2.6 iris, which allows the camera to record video in 1080p. The device has a slot for microSD memory cards, you can install up to 64 GB memory card.
